SUMMARY

Full Stack Web Developer with hands-on experience in building scalable web applications using the MERN stack. Skilled in developing responsive UIs, REST APIs, authentication systems, and real-time features. Strong foundation in frontend and backend integration.

PROFESSIONAL EXPERIENCE

MERN PROJECT

Jusschat – A Chatting Web App

- JussChat is a real-time chat web application built using the MERN stack. Implemented secure user authentication using JWT and real-time messaging using Socket.io.
- Designed RESTful APIs and managed user data and chat history using MongoDB. Built a responsive and user-friendly interface for seamless communication.

Full Stack Project

CarryGoods – A Logistic Web App

- Designed and developed a logistics service website similar to Porter and Lalamove using HTML, CSS, JavaScript, and PHP
- Implemented user login, order tracking, and session management with custom PHP and JS.
- Worked on responsive design to ensure smooth usage on desktop and mobile devices Currently working on features like real-time order tracking and admin dashboard.
- Stored and managed user authentication data and order details efficiently using MySQL.

Frontend – jigzip.com

Jigzip –A file converting web app

- Designed and developed a file converter webapp's frontend using html, css and javascript.
- Designed a clean and responsive user interface for a file conversion web application.
